BHAKTA KAVI NARSINH MEHTA UNIVERSITY JUNAGADH

(Gujarat) INDIA

CURRICULUM FOR

M. Sc. (IT & CA)

(Master of Science – Information Technology & Computer Application)

(Semester - 3 & 4)

Effective from JUNE – 2019

BHAKTA KAVI NARSINH MEHTA UNIVERSITY

Master of Science (Information Technology & Computer Application) – Sem – 3

[2 Years– Four Semester Full Time Program]

Code	Course	No. Of Lectures/ Lab (Per Week)	Credit
CS–13	HYBRID MOBILE APPLICATIONS DEVELOPMENT USING WEB TECHNOLOGIES	5	**5**
CS–14	WEB APPLICATION DEVELOPMENT USING DJANGO	5	**5**
CS–15	PROGRAMMING WITH R FOR DATA SCIENCE	5	**5**
CS–16	PRACTICAL – 1 (BASED ON CS – 13)	5	**5**
CS–17	PRACTICAL – 2 (BASED ON CS – 14 & CS – 15)	5	**5**
CS–18	PROJECT DEVELOPMENT(In House)	5	**5**
	Total Credits of Semester – 3		**30**

CS – 13: HYBRID MOBILE APPLICATIONS DEVELOPMENT USING WEB TECHNOLOGIES

Objective:
- Focuses on developing multiplatform mobile applications using the Web skills (HTML5, CSS and JavaScript).
- Understand AngularJS basic and advanced in-depth concepts.
- Using the Cordova hybrid application framework to develop and target multiple mobile platforms with a single codebases.
- Using Ionic framework, one of fastest growing mobile application frameworks, that is built with mobile-optimized HTML5 and CSS based components and AngularJS.
- Understand NodeJS concepts.
- Publish mobile app on play store and app store.
- Understand UI development with Ionic and then using Cordova's modules to access the native mobile platform's capabilities from Javascript.

Pre-Requisites:
- Basic Programming Knowledge
- Basic Knowledge of HTML, CSS and Java Script
- Good Knowledge of Bootstrap
- Familiarity with AngularJS.

Unit – 1
Introduction to Hybrid Application, Development Platforms

- What is hybrid application?
- Need of hybrid application development
- Tool and platforms in used for development of hybrid mobile application development
  - Phonegap-cordova
  - Ionic
  - Mobile angular UI
- Step by step installation of coredova using git and npm
- Introduction to HTML 5 and HTML 5 APIs
  - Forms validation
  - Audio video tags
  - Data storage APIs
    - Local storage
    - Web sql
    - IndexedDB
- Introduction to CSS, Sscss, less
- Using bootstrap.css with mobile application development

Unit - 2
Java Script for Mobile Application Development

- Introduction to Java Script
- Variables, Scopes and functions in Java Script
- What is jquery?
- Forms, data validation and storage using jquery
  - o Storage on client side(HTML 5 storage APIs)
  - o Sending data over server side (may serverside be PHP or NodeJs)
- What is angularjs?
- Role of angularjs in platforms like mobile angular UI and lconic
- $scope and $rootScope
- Config() and Run()
- Directives in angularjs
  - Ng-model, Ng-bind, Ng-app, Ng-click, Ng-show/Ng-hide, Ng-init, Ng-submit, Ng-repeat, User-define dierctives
- Filters in angularjs, Angular forms, Angular validation, Angular module, angular controller, angular factory, service
- ui-router (restful application development)
- $state, $stateParms, $stateProvider.state()
- MVC architecture of angularjs
- Implementation of model (FACTORY/SERVICE), controller and view for data handling
- Development a TO-DO, task application using angularjs

Unit – 3
Ionic – 1

- Introduction to Ionic platform for hybrid mobile application development
- Step by step installation of Ionic
- Command line interface handling of Ionic-1
- Creating project in Ionic (CLI APPROACH)
- Component of Ionic-1
  - Colors, header, button, list, card, forms, checkgbox, radiobuttons, range, select (drop down), tabs, grid
- Ionic java script components
  - Action sheet, backdrop, content, forms, model, popover, popup, SideMenu, SlideBox
- Platform management in Ionic-1
- Plugins for Ionic-1
- ngCordova plugins
- stateful approach of developing Ionic applications ($stateProvider.state())
  - passing data into the state by URL
  - States hierarchy
- Injection of controllers and factories in modules
- Icon and Splash Screen for Ionic applications

- Implementation of MVC architecture (exactly as MVC of angularJS)
- http request and promises in factory ()
- populating data into view from controller
- Themes in Ionic

Unit – 4
Interaction with Server - Side PHP

- Database connection to MySQL
- Associative arrays and array handling in PHP
    array_push(), array_pop(), array_search(),in_array()
- Reading JSON as input
    file_get_contents("php://input");
     json_encode() and json_decode()
- data communication and interaction with client side using JSON
- CRUD operation with PHP and MySQL
  C=create (INSERT QUERY), R=read (SELECT QUERY), u = update (UPDATE QUERY), D=delete (DELETE QUERY)
- Introduction to Nodejs
- Architecture of Nodejs
- Step by step installation of Nodejs
- Introduction to express-Nodejs
- Create a server and listen to port in Nodejs

Unit – 5
Accessing Native Services using Ionic and Application Signing and Development

- Ionic-cordova integration, Ionic-camera, Ionic-native audio, Ionic-media, Ionic-InApp browser
- Introduction to git
- Basic commands in git
    Push, pull, commit, rollback, status, init, branch
- Git branches
- Git push & pull operations
- Significance and importance of git in development of applications
- Maintaining version of applications using git
- Android o Signing application (keystore) o Publishing application on play store
- IOS
- Build and publication application in App store

CS – 14 : WEB APPLICATION DEVELOPMENT USING DJANGO

Objective:

- Understand how to learn a web development framework.
- Understand how to use Python and Django to develop modern web applications.
- Gain functional knowledge of Python, Databases and the Django framework.
- Understand current web development best practices.
- Build and deploy a Python Django web application that incorporates a database.

Pre Requisites:

- Basic programming knowledge.
- Object Oriented Programming knowledge.
- Knowledge Python would be desired, not mandatory.

Unit – 1

Introduction to Python, Python Basics, Language Components, Collections & Functions

- A Brief History of Python, Strengths and Weaknesses, Python Versions.
- Installing Python
- Python Basics
    - IDLE
    - Editing Python Files, Getting Help
    - Environment Variables
    - Executing Python from the Command Line
    - Dynamic Types
    - Python Reserved Words
    - Naming Conventions
    - Basic Syntax, Comments, String Values, String Operations
    - String Slices, String Operators
    - Numeric Data Types
    - Conversions
    - Simple Input and Output
    - The print() function.
    - The format() method
    - Lambda function

- Conditional Structure & Control Flow
    - Indenting
    - if statement, if…else…, nested if statement, etc.
    - Relational Operators, Logical Operators, True or False, Bit Wise Operators.
    - The while loop
    - break and continue
    - The for loop
- Data Collections
    - Lists, List Comprehension
    - Tuples

- o   Sets
- o   Dictionaries, Sorting Dictionaries
- o   Copying Collections
- o   Summary
- Defining Your Own Functions
  - o   Parameters
  - o   Function Documentation
  - o   Keyword and Optional Parameters
  - o   Passing Collections to a Function.

Unit – 2
Introduction to DJango Web Framework

- HTTP Client-Server Request-Response
- Concept of Web Framework and Web Application.
- Introduction to Django
  - o   MVC Design Pattern
  - o   Django installation
  - o   Setting up database
  - o   Starting project.
- Django Project Architecture
  - o   Understanding manage.py
  - o   Understanding settings.py
  - o   Understanding __init__.py and wsgi.py
  - o   Understanding urls.py and Python regular expression
  - o   Understanding admin.py
  - o   Understanding models.py
  - o   Understanding views.py
- Running Django development server
- Template system basics
  - o   Using template system
  - o   Basic template tags and filters
  - o   Using templates in views
  - o   template loading

Unit – 3
Interaction with Database

- Configuring database
  - o   defining model
  - o   basic data access
  - o   inserting data
  - o   updating data
  - o   selecting objects
  - o   deleting objects
- Introduction to SQLiteStudio, Data Manipulation using SQLiteStudio

Unit – 4
Django Admin Site, Forms, Views and URLConfs

- Activating the Admin interface
  - Creating Super user for Admin site
  - Using the Admin site
  - django.contrib package.
- Form basics
  - GET and POST methods
  - Form validation
  - Rendering forms
  - Model Form
- Understanding the view layer
- Requesting a web page via URL
- Rendering web page via view function
- Render HTTPResponse to templates
- Understanding context data and Python dictionary type.

Unit – 5
Cookies, Sessions, Testing and Deploying Web Application

- Cookies
  - Getting and Setting Cookies.
- Session
  - Django's session framework: enabling sessions, using session in views, session outside views.
- Testing Django, Python's unittest2 library
- Deploying Django application on GitHub / Amazon Web Service.

CS – 15 : PROGRAMMING WITH R FOR DATA SCIENCE

Objective:
- The main objective of this syllabus is to ensure the working aspects of R-Programming.
- Here, Students will be able to learn R programming with various level of strategic inputs such as Vectors, Arrays, Matrices, Strings and Factors etc.
- The course also covers the understanding the aspects of Packages and at last Visualize the data in the form of graph in various ways.

Pre Requisites:
- A basic understanding of any of the computer programming language will help in understand the R programming concepts.
- Relevant knowledge of Linux OS needed if working in Open source OS for various IDE's

Unit – 1
Introduction to Data Analysis & Fundamentals of R

- Overview of Data Analytics, Need of Data Analytics
- Classification of Data: Structured, Semi-Structured, Unstructured,
- Characteristics of Data, Applications of Data Analytics.
- Setup with R Studio
- R Commands, Variables, Data Types.
- Vectors
  - Sequences, Lengths, Names, Indexing vectors, Vector Recycling and Repetition
- Matrices and Arrays
  - Creating Arrays and Matrices,
  - Row, Columns and Dimensions
  - Row, Column and Dimension names, Array Arithmetic
- Lists
  - Creating Lists, Atomic and Recursive Variables, List Dimensions and Arithmetic
  - Indexing Lists, Converting Between Vectors and Lists
  - Combining Lists, NULL. Pair lists
- Data Input
  - Data Input from Keyboard, Input from files(CSV), input from files using scan, Reading data from a file using readLines, Masking Input and output formats, Checking Files from cmd.
- Data Frames
  - Creating Data Frames, Indexing Data Frames, Basic Data Frames Manipulation

Unit – 2
Environment, Functions, String, Factors, Flow Control and Loops

- Environments
- Functions – Creating and calling Functions, Passing functions to and from other functions, Variable scope, Commands to Functions, Functions and Functional Programming, Function Objects and Function Calls, Debugging, Interactive Tracing and Editing, Conditions: Errors and Warnings, Testing R Software.
- Strings
- Constructing and Printing Strings, Formatting Numbers, Special Characters, Changing Case, Extracting Substrings Splitting Strings, File Paths
- Factors
  Creating Factors, Changing Factor Levels, Dropping Factor Levels, Ordered Factors, Converting Continuous Variables to Categorical, Converting Categorical Variables to continuous, Generating Factor Levels, Combining Factor Levels
- Flow Control and Loops
  Flow Control – if and else, Vectorized if, Multiple selections
  Loops – repeat, while, for, lapply, sapply,
- Advance Loops – Replication, Looping over Lists, Looping Over Arrays, Multiple Inputs, Split-Apply-Combine, the plyr package.

Unit – 3
Creating Packages and working with date & time

- Packages
  - Loading Packages – The search path, Libraries and Installed packages
  - Installing Packages
  - Maintaining Packages
- Dates and Time

Unit - 4
Data Visualization and Graphics

- Reading and getting data into R (External Data): Using CSV files, XML files, Web Data, JSON files, Databases, Excel files.
- Working with R Charts and Graphs: Histograms, Boxplots, Bar Charts, Line Graphs, Scatterplots, Pie Charts

Unit – 5
Analytics Using R

- Big Data analytics using R.
- Business Foundation Analytics Using R
- Data Flow and Management for Business Operations and Problem Solving
- Typical Analytical Process Flow
- Data Collections Method
- Data Summarization and Presentation

- Managing Data using Analytics Tools (R)
- Data Manipulation and Report Generation Using R

CS – 16   **100 Marks**

PRACTICAL – 1 (Based on CS – 13)

> CS – 13 – Hybrid Mobile Applications Development Using Web Technologies

- Each session is of 3 hours for the purpose of practical Examination.
- Practical examination may be arranged before or after theory exam

CS – 17   **100 Marks**

PRACTICAL – 2 (Based on CS – 14 & CS – 15)

> CS – 14 – Web Application Development Using DJANGO
> CS – 15 – Programming With R For Data Science

- Each session is of 3 hours for the purpose of practical Examination.
- Practical examination may be arranged before or after theory exam

CS – 18   **100 Marks**

PROJECT DEVELOPMENT (IN HOUSE)

(Project must be developed in the computer laboratory of concern institute under the supervision of faculties of concern institute on any subject of previous semester or current semester. **(At the time of Project-Viva examination student must show Project Report (in hard copy) along with all the Workouts in workbook, implementation of project in SDLC Documentation, Program codes and project in running mode**

Note :

- Project must be submitted before two week of commencement of theory exam.
- Project viva examination may be arranged before or after theory exam.
- During the project viva examination project must be run.

BHAKTA KAVI NARSINH MEHTA UNIVERSITY JUNAGADH

(Gujarat) INDIA

CURRICULUM FOR

M. Sc. (IT & CA)

(Master of Science – Information Technology & Computer Application)

(Semester - 4)

Effective from November –2019

BHAKTA KAVI NARSINH MEHTA UNIVERSITY

Master of Science (Information Technology & Computer Application) – Sem – 4

[2 Years– Four Semester Full Time Program]

Code	Course	No. Of Lectures/ Lab (Per Week)	Credit
CS–19	INDUSTRIAL PROJECT DEVELOPMENT	-	30
	Total Credits of Semester – 4		30

CS – 19 **300 Marks**

Industrial Project Development

(Project must be developed at industrial organization (At the time of project-Viva examination students must show project Report (In Hard Copy) along with all the Workouts in workbook, implementation of project in SDLC, Documentation, and Program codes (Optional) and project in running mode).

Guidelines:

1) Institute/College/Department has to make arrangement for the students for project development in various software development organizations in industry.
2) Project work must be developed at the industrial organization, not at the paid or free project training institute.
3) Internal guide from institute and external guide from Industry must be allocated for supervision
4) Coding standards should be followed meticulously. At the minimum, the code should be self-documented, modular, and should use the meaningful naming convention.
5) The documentation should include a chapter on "Learning during Project Work", i.e. "Experience of Journey during Project Duration".

Sr. No.	Evaluation Criteria	Marks
1	EXPLANATION OF CODE	75
2	EXPLANATION OF ANALYSIS AND DESIGN	75
3	DOCUMENTATION	75
4	PRESENTATION	75
