## I. INTRODUCTION

### A. RISK FACTORS

#### 1. Standard Risk Factors:

1. Mutual Fund units and security investments are subject to market risks and there is no assurance or guarantee that the objectives of the Scheme will be achieved.
2. As with any investment in securities, the NAV of the Units issued under the Scheme can go up or down depending on the factors and forces affecting the capital markets.
3. Past performance of the Sponsors / AMC / Mutual Fund or their affiliates is not necessarily indicative of the future performance of the Scheme.
4. The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs.1 lakh made by them towards setting up the Mutual Fund or such other accretions and additions to the same.
5. SBI Gold Fund is the name of the Scheme and does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
6. The NAV's of the Scheme may be affected by the changes in the general market conditions, factors and forces affecting the capital markets in particular, level of interest rates, various market related factors and trading volumes, settlement periods and transfer procedures, currency exchange rates, changes in the government policies, taxation laws, any other policies, political and economic developments etc.
7. Subject to the Regulations, the Sponsor / affiliates / subsidiaries, the AMC or the Board of Trustees may invest either directly or indirectly in the Scheme. These entities may acquire a substantial portion of the Scheme's units and collectively constitute a major investor in the Scheme. Accordingly, redemption of units by these entities may have an adverse impact on the units of the Scheme because the timing of such redemption may impact the ability of other unitholders to redeem their units. The same impact would exist for any large investor, who holds a significant number of units of the Scheme.
8. In the event of receipt of an inordinately large number of redemption requests and inability of the Underlying Scheme(s) to generate enough liquidity because of market conditions, there may be delays in redemption of units.
9. The liquidity of the Scheme's investments is inherently restricted by liquidity of Underlying Scheme.
10. Unitholders of the Scheme are not being offered any guarantee / assured returns.
11. Changes in government policy in general and in tax benefits applicable to mutual funds may impact the returns to investors in the Scheme.

#### 2. Scheme Specific Risk Factors:

- a. SBI Gold Fund would be investing in the units of SBI GETS. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the underlying scheme of mutual funds wherein the Scheme has invested. As a result, the time taken by the Mutual Fund for the redemption of units may be significant in the event of a high number of redemption requests or a restructuring of the scheme. In view of the above, the Trustee has a right in its sole discretion, to limit

redemptions under certain circumstances as described under the section titled Right to Limit Redemptions.

- b. The Mutual Fund is not assuring any dividend nor is it assuring that it will make any dividend distributions. All dividend distributions are subject to the availability of distributable surplus and would depend on the performance of the scheme.
- c. Investments under the scheme may also be subject to the following risks:

**Market Risk**

The Scheme's NAV will react to the prices of gold. The investor could lose money over short periods due to fluctuation in the Scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in gold prices, market movements and over longer periods during market upturns.

Additionally, the prices of gold may be affected by several factors such as global gold supply and demand, investors' expectations with respect to the rate of inflation, currency exchange rates, interest rates, etc. Crises may motivate large-scale sales of gold, which could decrease the domestic price of gold.

Some of the key factors affecting gold prices are as follows:

**Asset Class Risk**

The domestic price of gold may vary from time to time. Further, the returns from the types of securities in which a Scheme invests may underperform returns from the various general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under performance in comparison of the general securities markets.

**Central banks' sale**

Central banks across the world hold a part of their reserves in gold. The quantum of their sale in the market is one of the major determinants of gold prices. A higher supply than anticipated would lead to subdued gold prices and vice versa. Central banks buy gold to augment their existing reserves and to diversify from other asset classes. This acts as a support factor for gold prices.

**Macro-economic factors**

A weakening dollar, high inflation, the massive US trade deficits all act in favor of gold prices. The global trend of rising interest rates also had a positive impact on gold prices. Gold being regarded as a physical asset would lose its luster in a deflationary environment as gold is used effectively as an inflation hedge.

**Seasonal demand**

Since the demand for Gold in India is closely tied to the production of jewellery pieces tend to increase during the times of year when the demand for jewellery is the greatest, the demand for metals tends to be strong a few months ahead of these festive seasons, especially Dussera, Diwali, Akshaya Tritiya festival and summer wedding season in India. Christmas, Mothers Day, Valentine's Day, are also major festive and shopping for Gold.

**Safe keeping of Gold**

The gold held by the Custodian of SBI GETS may be subject to loss, damage, theft or restriction of access due to natural event or human actions. The Trustees may not have adequate sources of recovery if its gold is lost, damaged, stolen or destroyed and recovery may be limited, even in the event of fraud, to the market value of gold at the time the fraud is discovered. The custodian will maintain adequate insurance for its bullion and custody business. The liability of the Custodian is limited under the agreement between the AMC and the Custodian which establish the Mutual Fund's custody arrangements, or the custody agreements.

#### **Time lag in procurement/redemption of physical gold**

Procurement of gold bars may take up to 1 month in case of adverse shortage of gold bars. It may not be possible to sell gold bar intentionally and may delay redemption depending on the market conditions.

#### **Gold ETF Risk**

Gold Exchange Traded Funds in which scheme will be investing, invests in gold and gold bullion. NAV of the gold ETF & NAV of the scheme will change with the change in the prices of underlying assets. The prices of gold may be affected by several factors such as demand and supply of gold, change in political, economical environment and government policy, inflation trends, currency exchange rates, interest rates, etc.

#### **Lack of Market Liquidity**

Trading in SBI GETS on the Exchange may be halted because of market conditions or for reasons that in the view of the market authorities or SEBI, trading in SBI GETS is not advisable. In addition, trading in SBI GETS is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI "circuit filter" rules. There can be no assurance that the requirements of the market necessary to maintain the listing of SBI GETS will continue to be met or will remain unchanged. SBI GETS may suffer liquidity risk from domestic as well as international market.

#### **Tracking Error Risk**

- a. Tracking error means the variance between daily returns of the underlying benchmark (gold in this case) and the NAV of the scheme for any given period. NAV of the Scheme is dependent on valuation of gold. Gold has to be valued as per the formula provided by SEBI in its circular no. SEBI/IMD/CIR No. 2/65348/06 dated April 21, 2006. NAV so computed may vary from the price of Gold in the domestic market.
- b. Factors such as the fees and expenses of the Scheme, cash balance, changes to the Underlying assets and regulatory policies may affect AMC's ability to achieve close correlation with the Underlying assets of the scheme. The Scheme's returns may therefore deviate from those of its Underlying assets.
- c. Tracking error could be the result of a variety of factors including but not limited to:
  - i. Delay in the purchase or sale of gold due to
  - ii. Illiquidity of gold,
  - iii. Delay in realisation of sale proceeds,
  - iv. Creating a lot size to buy the required amount of gold
  - v. The scheme may buy or sell the gold at different points of time during the trading session at the then prevailing prices which may not correspond to its closing prices.
  - vi. The potential for trades to fail, which may result in the Scheme not having acquired gold at a price necessary to track the benchmark price.
  - vii. The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses.
  - viii. Disinvestments to meet redemptions, recurring expenses, dividend payouts etc.
  - ix. Execution of large buy / sell orders
  - x. Transaction cost (including taxes and insurance premium) and recurring expenses
  - xi. Use of gold related derivative instruments, as and when allowed by regulations
  - xii. Rebalancing of the portfolio
- d. Debt & Money market securities investments under the scheme may also be subject to the following risks:
  - I. Credit risk: Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuers' ability to meet the obligations.

- II. Liquidity Risk pertains to how saleable a security is in the market. If a particular security does not have a market at the time of sale, then the scheme may have to bear an impact depending on its exposure to that particular security.
  - III. Interest Rate risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The value of investments will appreciate/depreciate if the interest rates fall/rise. However if the investments are held on till maturity of the investments, the value of the investments will not be subjected to this risk.
  - IV. Reinvestment risk: This risk arises from uncertainty in the rate at which cash flows from an investment may be reinvested. This is because the bond will pay coupons, which will have to be reinvested. The rate at which the coupons will be reinvested will depend upon prevailing market rates at the time the coupons are received.
- e. **Risk associated with Stock Lending:** The Scheme shall not engage in stock lending.
  - f. **Risk associated with derivatives:** The Scheme shall not engage in derivatives.
  - g. The Trustees, AMC, Fund, their directors or their employees shall not be liable for any tax consequences that may arise in the event that the scheme is wound up for the reasons and in the manner provided under the Scheme Information Document & Statement of Additional Information.
  - h. Redemption by the unit holder due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustees, AMC, Fund their directors or their employees shall not be liable for any tax consequences that may arise.
  - i. The tax benefits described in the SAI & SID are as available under the present taxation laws and are available subject to relevant condition. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India and the Investors and Unit Holders should be aware that the relevant fiscal rules or their interpretation may change. As in the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of the investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor / Unit holder is advised to consult his/her/its own professional tax advisor.

**Risk Control strategies:**

The AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.

For the mitigation of the above mentioned risk-factors in underlying schemes, the Fund-Manager will follow an internal selection/allocation process approved by Investment Committee and Risk Department.

The Fund-Manager will be responsible for taking investment decisions, scheme selection, portfolio construction and timing of investment decisions within the approved framework.

The process will help to ensure the monitoring of the following within underlying schemes and for Money-Market exposures:

**For risk control, the following may be noted:**

**Liquidity risks:**

The liquidity of the FoF will be determined by the time taken by the Mutual Fund for the redemption of units in the underlying scheme which may be significant in the event of a high number of redemption requests or a restructuring of the scheme. The liquidity of the underlying scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by ensuring that investment is in line with the internal selection/allocation process approved by Investment Committee and Risk Department.

**Volatility risks:**

Investments in underlying scheme will have all the risks associated with the underlying schemes including performance of gold prices, interest rate risk, volatility etc. There is the risk of volatility in markets due to external factors like liquidity flows, economic policy etc. Volatility Risk can be partly mitigated by ensuring that judicious investments are made in line with the internal selection/allocation process approved by Investment Committee and Risk Department.

**Credit Risks**

Investments in debt & money market instruments will have credit risks resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations Credit Risk can be partly mitigated by ensuring that judicious investments are made in line with the internal selection/allocation process approved by Investment Committee and Risk Department.

**Gold ETFs**

The Scheme endeavors to mitigate risks associated with investing in physical gold like risk of loss, damage, theft and natural calamities/human actions by investing in approved Gold ETF/s with appropriate limits for each Gold ETF. These limits and controls are also aimed at minimizing the risks of Impact Costs, Exchange Rate and Liquidity Risks generally associated with Gold ETFs.

**B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME**

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

**C. SPECIAL CONSIDERATIONS, if any**

**A. TYPE OF THE SCHEME** – An open ended fund of fund scheme

**B. INVESTMENT OBJECTIVE**

The investment objective of the Scheme is to seek to provide returns that closely correspond to returns provided by SBI Gold Exchange Traded Scheme (SBI GETS).

**C. SCHEME'S ASSET ALLOCATION**

The funds collected under the plan shall generally be invested consistent with the objective of the plan in the following manner:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Maximum	Minimum	High/Medium/Low
Units of SBI GETS	100%	95%	Medium to high
Debt and Money market instruments	5%	0%	Low to medium

Performance will depend on the Asset Management Company's ability to assess accurately and react to changing market conditions.

The above investment pattern is indicative and may be changed by the Fund Manager for a short term period on defensive considerations, keeping in view market conditions, market opportunities, applicable SEBI (MF) Regulations 1996, legislative amendments and other political and economic factors, the intention being at all times to seek to protect the interests of the Unit Holders. Review and rebalancing of the portfolio will be done when the asset allocation falls outside the range given above. If the exposure falls outside the above mentioned asset allocation pattern, it will endeavour to restore within one month. If the fund manager for any reason is not able to rebalance the asset allocation within one month, the matter would be escalated to the Investment Committee for further direction. The Investment Committee shall record the reason in writing leading to the reason for falling outside the asset allocation and the Committee shall review and as consider necessary may further direct the manner for rebalancing the same within the range of the asset allocation as mentioned above. The funds raised under the scheme shall be invested only in transferable securities as per Regulation 44(1), Schedule 7 of the SEBI (Mutual Funds) Regulations, 1996.

SBI Gold Fund is the new scheme and hence does not have any performance track record.

#### **N. DEBT MARKET IN INDIA**

The Indian debt markets are one of the largest and rapidly developing markets in Asia. Government and Public Sector enterprises are the predominant borrowers in the market. The debt markets have received lot of regulatory and governmental focus off late and are developing fast, with the rapid introduction of new instruments including derivatives. Foreign Institutional Investors are also allowed to invest in Indian debt markets subject to ceiling levels announced by the government. There has been a considerable increase in the trading volumes in the market. The trading volumes are largely concentrated in the Government of India Securities, which contribute a significant proportion of the daily trades.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks), Treasury Bills (issued by RBI) and the CBLO (collateralized lending and borrowing facility).

Government securities are largely traded on a Negotiated Order Matching system (NDS OM) apart from the OTC market. The settlement of trades both in the Gsec markets and the overnight repo and CBLO are guaranteed and done by a central counterparty, the Clearing corporation of India (CCIL). Money market deals involving CD's and CP's are traded and settled on an OTC basis. The clearing and settlement of corporate bond deals are now routed through a central counterparty established by the exchanges BSE (ICCL) and NSE (NSCCL) which settles deals on a DVP (Delivery versus payment) non guaranteed basis.

The current market yields of various instruments and the factors affecting prices of such securities are given hereunder. The securitized instruments of higher ratings generally offer yields which are 50-75 basis points higher than the comparable normal debt instruments.

Following are the yield matrix of various debt instruments:

<b>Instruments</b>	<b>Indicative yield range</b>
Overnight rates-	6.50% - 7.00%
90 day Commercial Paper	9.00%- 9.50%
91-day T-bill	7.00%- 7.35%
1 year G-Sec.	7.50%- 7.65%
5 year G – Sec	8.00% – 8.20 %
10 year G-Sec.	7.80%-8.15%
1 year AAA Bond	9.50%-9.65 %
5 year AAA Bond	9.15%– 9.30 %

The interest rate market conditions are influenced by the Liquidity in the system, Credit growth, GDP growth, Inflows into the Country, Currency movement in the Forex market, demand and supply of issues and change in investors' preference. Generally when there is a rise in interest rates the price of securities fall and vice versa. The extent of change in price shall depend on the rating, tenor to maturity, coupon and the extent of fall or rise in interest rates. The Government securities carry zero credit risk, but they carry interest rate risk like any other Fixed Income Securities. Money market instruments such as CP's and CD's which are fairly liquid are not listed in exchanges. The impact cost of offloading the various asset classes differ depending on market conditions and may impair the value of the securities to that extent. Further, investments in securitized instruments or structured obligation papers carry a higher illiquidity risk. They also carry limited recourse to the originator, delinquency risk out of the defaults on the receivables and prepayment risk which affects the yields on the instruments.

#### **O. INVESTMENT OF AMC IN THE SCHEME**

The AMC may invest in the scheme, such amount, as they deem appropriate. But the AMC shall not be entitled to charge any management fees on this investment in the scheme. Investments by the AMC will be in accordance with Regulation 24(3) of the SEBI (MF) Regulations, 1996 which states that:
