

IEEE Xplore Journal and Conference Lists

There are two worksheets in this Excel file, one for journals and one for conferences. This is a current snapshot of our titles as of 8/19/04

Our online packages are IEL, or the IEEE/IEE Electronic library (everything we offer digitally with start dates of 1988 or 1950s, depending on the title); ASPP, or the All-Society Periodicals Package (our IEEE journals package from 1998 - present); POP, or Proceedings Order Plan (conference proceedings from 1998 - present); and, finally, POP All (the complete conference package, yet the start date is 1998).

The journals are self-explanatory, and I've noted which titles are in our ASPP package versus our IEL package. The only variation that some customers might have is that it is possible to purchase IEEE Spectrum and Proceedings of the IEEE individually to add to an ASPP package. In 2003, we added archival titles back to the 1950s for 12 of our technical societies, so this list has grown since last year, and there are lots of older titles which are no longer actively being published.

Conferences are handled as individual monographs. You'll see thousands of titles on this list, and each year's conference proceeding is an individual entry. Some titles have ISBNs, and some titles have ISSNs. If the PU number is missing, look at the ship date. It may be too new to be online yet. You can also look at the "Comments" column. Some conferences were cancelled or had problems with the proceedings. Also, you'll notice that there are varying levels of information for our conferences. IEE and legacy (pre-1988) titles have very little information.

To build links to any of our titles (at the title level), you need to use the PU Numbers in these spreadsheets. The linking algorithm is: **<http://ieeexplore.ieee.org/servlet/opac?punumber=X>**. Replace the "X" with a PU number from the spreadsheet.
