AIMS Test for Management Admissions (ATMA) is conducted for those candidates, who want to get enrolled into various management institutes of India. The test is conducted by the Association of Indian Management Schools (AIMS) for postgraduate courses in management and computer applications - Master of Business Administration (MBA), Post Graduate Diploma in Management (PGDM and Master of Computer Application (MBA).

Syllabus
Association of Indian Management Schools (AIMS) has not prescribed any particular syllabus for the entrance test, because it is designed to test the aptitude of the candidates. Nonetheless, the students can practice questions based on Analytical Reasoning and Quantitative Skills. Given below is a brief description of each topic.

Analytical Reasoning
The students should have logical thinking ability as well as must be able to analyze the situation given in the question, to give the right answer.

Quantitative Skills
Questions are asked to examine the candidate's ability to think quantitatively, solve quantitative problems, data sufficiency and also basic knowledge of Arithmetic, Algebra and Geometry. In order to prepare for verbal skills, the student has to be proficient in English Language, that is, should be thorough with reading comprehension, sentence correction, vocabulary, sentence completion etc.
