

Solving the Most Complex Visual Computing Challenges

NVIDIA Corporation is the worldwide leader in programmable graphics processor technologies. NVIDIA creates innovative, industry-changing products for computing, consumer electronics, and mobile devices. The NVIDIA® graphics processing unit (GPU) and media and communications processor (MCP) brands include NVIDIA GeForce®, NVIDIA GoForce®, NVIDIA Quadro®, and NVIDIA nForce®. These product families are transforming visually-rich applications such as video games, film production, broadcasting, industrial design, space exploration, and medical imaging.

Work with Some of the Most Talented People in the Industry

Our employees thrive in a high performance culture. This group of very talented and passionate people is joined in a single pursuit—to touch people’s lives with innovative technologies that transform the way people work and play. MBA Interns have an opportunity to partner with the brightest minds in technology and work on uniquely challenging projects that create impact throughout the organization.

A few of NVIDIA's MBA Interns

About the MBA Internship Program

NVIDIA targets the brightest candidates from leading MBA programs to support its business development, product management and marketing organizations. In addition to tackling challenging business issues, interns receive a rounded experience that includes learning and development, mentorship and access to NVIDIA leaders. Our Executive Leadership Series offers an extensive view into our business units and how our executives are building those businesses. We provide interns with an in-depth perspective into our industry, company and culture, to ensure they have the tools they need for success. We are committed to creating NVIDIA's future leaders.

“ I chose to work at NVIDIA because it is a company that is entrepreneurially minded, growing fast, and has a tremendously bright future. I’ve had the opportunity to interact with all of the top-level managers and helped to formulate many different types of market and competitive strategies to pursue. This was all possible because of NVIDIA’s relatively flat hierarchy which allows an intern the opportunity to be heard and make a big difference.”

— Jonathan Barad
MBA Corporate Development Intern
Harvard Business School

“ NVIDIA is unique in the sense that even though the company has grown significantly in the past several years and has become a leader in the graphics industry, its culture is still very much entrepreneurial. As the company continues to grow, there are tremendous opportunities for MBA’s with business skills to make an impact. The fact that CEO Jensen Huang comes to an one-hour lunch session and ends up spending over two hours with the eight MBA interns is indicative of how MBAs are valued within NVIDIA. In fact, I have been very impressed with the resources the company has invested in creating a structured and meaningful MBA internship.”

— Wenjin Zhou
MBA Marketing Intern
MIT Sloan School of Management

These products are transforming visually-rich applications in video game development, film production, broadcasting, industrial design, space exploration and medical imaging.

NVIDIA is Looking for World-class Talent

Product Management Intern

The Product Management intern will support one of NVIDIA's leading brands, NVIDIA® GeForce®, NVIDIA nForce®, or NVIDIA Quadro®.

Responsibilities include but are not limited to: developing market intelligence reports, forecasting, trend analyses, pricing, competitive analyses, and product roadmaps. Specifically, you will help develop business and market models to drive the next level of growth for NVIDIA's business.

Business Development Intern

NVIDIA is looking for a Business Development Intern who can thrive in a fast-paced working environment as a part of the business development team. Responsibilities include but are not limited to industry research and tracking, analysis of new business opportunities, financial analysis and modeling, and transaction structuring and negotiation. Specifically, you will support NVIDIA's existing business development team to evaluate and act on opportunities to drive growth of the company.

Strong business, financial and negotiation skills are essential as the Business Development Intern must work proactively across various functional areas in the company.

Product Management and Business Development Position Qualifications:

Ideal candidate should possess a technical degree in EE, CE, CS, or equivalent and is pursuing an MBA at a leading school

- Hands-on experience in market research, financial analysis and modeling
- Strong understanding of the semiconductor industry and PC industry dynamics
- Familiarity with product life cycles
- 3-5 years of applicable working experience

Brand Manager Intern

As a key member of the NVIDIA Marketing Communications Team, the Brand Manager is responsible for driving product introductions and marketing campaigns around the world.

The successful candidate must be an outstanding project/campaign manager with the talent to influence a virtual team around the world to drive toward a goal under aggressive schedules. Proactive, detailed organization and ability to orchestrate many moving parts with intensity is a must. The Brand Manager must also have experience with and passion about creative work—from formulating creative briefs to writing copy to conceptualizing key imagery that will ultimately be packaged into a variety of world-class marketing tools for teams and partners around the world. The Brand Manager is the go-to Corporate Marketing champion on their specific product brand acting as the conduit with Product Marketing, Sales and external customers and partners.

Qualifications:

Ideal candidate should possess an undergraduate degree in marketing or communications and is pursuing an MBA at a leading school

- 5+ years marketing communications experience, ideally within the hardware computer industry
- Strong written and verbal communications; must enjoy writing/editing
- Proven ability to interact with and influence diverse groups within marketing, including senior management
