CIRCULAR:

30 x 6 = 180

A reference is invited to the Ordinances, Regulations and syllabi relating to the Bachelor of Engineering degree course vide this office Circular No.UG/347 of 2002, dated 17th August, 2002 and the Principals of the affiliated Colleges in Engineering are hereby informed that the recommendation made by the Faculty of Technology at its meeting held on 26th March, 2008 has been accepted by the Academic Council at its meeting held on 15th April, 2008 vide item No.4.32 and that, in accordance herewith, the Scheme of Examination and syllabi for the Second Year (Sem. III & IV) leading to the B.E. degree course for the Mechanical Engineering is revised as per Appendix and that the same has been brought into force with effect from the academic year 2008 - 2009.

MUMBAI-400 032

10th June, 2008

for REGISTRAR

To.

The Principals of the affiliated colleges in Engineering.

A.C./4.32/15.4.2008

No.UG/228-A of 2008,

MUMBAI-400 032

10th June, 2008

Copy forwarded with compliments for information to :-

- 1) The Dean, Faculty of Technology,
- 2) The Chairman, Board of Studies in Mechanical Engineering.
- 3) The Controller of Examinations,
- 4) The Co-Ordinator, University Computerization Centre,

for REGISTRAR

Copy to :-

The Director, Board of College and University Development, the Deputy Registrar (Eligibility and Migration Section), the Director of Students Welfare, the Executive Secretary to the Vice-Chancellor, the Pro-Vice-Chancellor, the Registrar and the Assistant Registrar, Administrative sub-center, Ratnagiri for information.

The Controller of Examinations (10 copies), the Finance and Accounts Officer (2 copies), Record Section (5 copies), Publications Section (5 copies), the Deputy Registrar, Enrolment, Eligibility and Migration Section (3 copies), the Deputy Registrar, Statistical Unit (2 copies), the Deputy Registrar (Accounts Section), Vidyanagari (2 copies), the Deputy Registrar, Affiliation Section (2 copies), the Director, Institute of Distance Education, (10 copies) the Director University Computer Center (IDE Building), Vidyanagari, (2 copies) the Deputy Registrar (Special Cell), the Deputy Registrar, (PRO) the Assistant Registrar, Academic Authorities Unit (2 copies) and the Assistant Registrar, Executive Authorities Unit (2 copies). They are requested to treat this as action taken report on the concerned resolution adopted by the Academic Council referred to in the above Circular and that, no separate Action Taken Report will be sent in this connection. the Assistant Registrar Constituent Colleges Unit (2 copies), BUCI (1 copy), the Deputy Account, Unit V(1 copy), the In-charge Director, Centralize Computing Facility (1 copy), the Assistant (1 copy), the Telephone Operator (1 copy), the Secretary MUASA (1 copy), the Superintendent, Post-graduate Section (2 copies), the Superintendent, Thesis Section (2 copies)

(PE) - Practical Examination

SUBJECT: APPLIED MATHEMATICS III

Periods per week min.	Lecture	4	
	Practical	--	
	Tutorial	1	
		Hours	Marks
Evaluation System	Theory Examination	3	100
	Practical	--	--
	Oral Examination	--	--
	Term Work	--	25
	TOTAL		125

Sr. No.	Details	Hrs.
Module 01	1. Complex Variables	08
	1.1 Functions of Complex variable	
	1.2 Continuity (only statement) and derivability	
	1.3 Analytic Function. Necessary conditions for the function to be analytic (statement of sufficient condition)	
	1.4 Cauchy Riemann equations in polar coordinates	
	1.5 Harmonic function and orthogonal trajectories	
	1.6 Milne-Thomson method to find analytic Function $f(z)=u+iv$ for given $u, v, u+v, u-v$	
Module 02	2. Mapping	03
	2.1 Conformal mapping	
	2.2 Standard transformations and Bilinear transformation	
	2.3 Fixed points and cross ratio	
Module 03	3. Complex Integration	11
	3.1 Regions and Paths in the Z-plane	
	3.2 Line integral of a function of complex variable	
	3.3 Cauchy's integral theorem	
	3.4 Cauchy's integral formula and deduction (without proof)	
	3.5 Taylor's and Laurent's development (without proof)	
	3.6 Singularities, poles, residue at isolated singularity and its evaluation	
	3.7 Residue Theorem	
Module 04	4. Laplace's Transforms	07
	4.1 Function of bounded variation (statement only)	
	4.2 Laplace's transforms of $1, t^n, e^{at}, \sin(at), \cos(at), \sinh(at), \cosh(at)$	
	4.3 Linearity property, expressions (without proof) for $L[e^{at} f(t)]$, $L[f(at)], L[t^n f(t)], L[f(t)/t]$.	
	4.4 Periodic functions, Heaviside unit step function, Dirac-delta Function and their Laplace transforms (statement only)	
Module	5. Inverse Laplace Transforms	07

3

5.1 Linearity property evaluation of inverse Laplace Transforms using theorems and by partial fraction method

5.2 Convolution Theorem (without proof) and Heaviside development

5.3 Application to solve initial and boundary value problems involving ordinary differential equations with one dependent variable

Module
06

6. Matrices

12

6.1 Types of Matrices

6.2 Adjoint of a matrix, Inverse of a matrix, Orthogonal and Unitary Matrices

6.3 Elementary transformations, rank of a matrix.

6.4 Reduction to a normal form.

6.5 System of homogeneous and non homogeneous equations, their Consistency and solution

6.6 Brief revision of vectors over real field, Inner product, Norm, Linear dependence and independence, Orthogonality of matrix

6.7 Characteristic polynomial, values and vectors of square matrix

6.8 Characteristic polynomial, Cayley Hamilton Theorem (without proof) Functions of square matrix.

Theory Examination:

1. Question paper will comprise of total seven question, each of 20 Marks
2. Question one will be compulsory and based on maximum part of syllabus
3. Remaining questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
4. Only five question need to be solved.

In question paper weightage of each module will be proportional to number of respective lecture hours as mentioned in the syllabus.

Term Work:

The distribution of marks for term work shall be as follows:

- Tutorial work: One assignment on each module containing 05 problems) 10 Marks.
- Test (at least one): 10 Marks.
- Attendance (Tutorial & theory): 05 Marks.

TOTAL: 25 Marks.

References:

1. Matrices : Vasistha
2. A Text Book of Applied Mathematics : P. N. & J. N. Warkar
3. Higher Engineering Mathematics : B. S. Grewal
4. Advance Engineering Mathematics : E. Kreyszig
5. Complex variables : R. V. Churchill
6. Laplace Transforms : Schaum series

CLASS: SE (Mechanical / Automobile)

Semester- III

SUBJECT: STRENGTH OF MATERIALS

Periods per week 1Period of 60 min.	Lecture	4	
	Practical	2	
	Tutorial	--	
		Hours	Marks
Evaluation System	Theory Examination	3	100
	Practical	2	25
	Oral Examination	--	25
	Term Work	--	25
	TOTAL		175

Sr. No.	Details	Hrs.
Module 01	STRESS AND STRAIN:- Definition, Stress strain, tensile and compressive stresses, shear stress-Elastic limit, Hooke's law, Poisson's ratio, modulus of elasticity, modulus of rigidity, bulk modulus, yield stress, ultimate stress, factor of safety, state of simple shear, relation between elastic constants, volumetric strain, volumetric strain for tri-axial loading, deformation of tapering members, deformation due to self weight, bars of varying sections, composite sections, Temperature stresses.	08
Module 02	SHEAR FORCE AND BENDING MOMENT IN BEAMS: Axial force, shear force and bending moment diagrams for statically determinate beams including beams with internal hinges for different types of loading, relationship between rate of loading, shear force and bending moment.	08
Module 03	STRESSES IN BEAMS:- Theory of pure bending, Assumptions Flexural formula for straight beams, moment of resistance, bending stress distribution, Section moduli for different sections, beams of uniform strength, Flitched beams, Principle axes, Principle moment of inertia. Direct and bending stresses, Core of section, Chimneys subjected to wind pressure	08
Module 04	SHEAR STRESSES IN BEAMS : Distribution of shear stress across plane sections used commonly for structural purposes, shear connectors TORSION Torsion of circular shafts – solid and hollow, stresses in shaft when transmitting power, Shafts in series and parallel. STRAIN ENERGY, Resilience, proof Resilience, Strain energy stored in the member due to gradually applied load, suddenly applied load, impact load, strain energy stored due to shear, Strain energy due to bending, Strain energy due to Torsion.	08
Module 05	DEFLECTION OF BEAMS: Deflection of cantilevers, simply supported and over hanging beams using double integration and Macaulay's methods for different types of loadings THIN CYLINDRICAL AND SPHERICAL SHELLS: Stress and strain in thin Cylinders and spheres due to internal pressure, Cylindrical shell with hemispherical ends	08
Module 06	PRINCIPLE STRESSES: General equations for transformation of stress, principal planes and principal stresses, maximum shear stress, determination using Mohr's circle, maximum principal & max. Shear stress theory of failure, Combined Bending and Torsion, Equivalent Bending moment and equivalent torque. COLUMNS AND STRUTS: Buckling load, Types of end conditions for column, Euler's column theory and its Limitations, Rankin Gordon Formula.	08

List of Experiments:

1. Tension test on mild steel bar (stress- strain behavior, modulus determination)
2. Test on tor-steel
3. Test on cast iron (transverse, tension)

5

- 7. Rockwell hardness test
- 8. Izod impact test/Charpy test
- 9. Flexural test on beam (central point load)
- 10. Flexural test on beam (two point load) (Plotting of load deflection curve & finding value of E for experiment no. 9&10)

Theory Examination:

- 1. Question paper will comprise of total seven question, each of 20 Marks
- 2. Only five question need to be solved
- 3. Question one will be compulsory and based on maximum part of syllabus
- 4. Remaining questions will be mixed in nature (for example supposed Q 2 has part (a) from module 3 then part (b) will be from any module other than module 3)
- 5. In question paper weight age of each module will be proportional to number of respective lecture hours as mentioned in the syllabus.

Practical and Oral Examination:

Practical and oral examination will be based on one experiment performed from the list of experiment given in the syllabus and the oral will based on the same experiment

Term Work:

Term work shall consist of minimum 07 experiments, assignments and 24 problems (4 problems on each module) and written test. The distribution of marks for term work shall be as follows:

- Laboratory work (experiments/assignments): (10) Marks
- Test (at least one): (10) Marks
- Attendance (practical & theory): (05) Marks

TOTAL: (25) Marks.

Text Books:

- 1. Mechanics of Structures Vol-1 SB Junnagar & shah, Charotar Publishers
- 2. Strength of Materials S Ramamarutham
- 3. Engineering Mechanics Timoshenko & Young, Tata McGraw Hill
- 4. Mechanics of Materials EP Popov, Prentice Hall of India
- 5. Strength of Materials W.A. Nash Schaum's outline series, Tata McGraw Hill

References:

- 1. Mechanics of Materials James Gere-Thompson Learning

- 7. Mechanics of Materials Riley Wiley India

SUBJECT: MACHINE DRAWING

Periods per week	1	Period of 60 min	Lecture	3	
			Practical	5	
			Tutorial	--	
				Hours	Marks
Evaluation System			Theory Examination	4	100
			Practical	3	50
			Oral Examination	--	--
			Term Work		25
			TOTAL		175

Sr. No.	Details	Hrs.
Module 01	<p>Solid Geometry: Intersection of surfaces and Interpretation of solids- Intersection of prism or cylinder with Prism cylinder or cone both solids in simple position only, Primary auxiliary views and aux. projections of simple machine parts.</p> <p>Machine Elements : Free hand sketches of M/C elements such as bolts, nuts, washers, studs, tapped holes, Conventional representation of assembly of Threaded parts in external and sectional Conventional representation of assembly of Threaded parts in external and sectional Views.</p>	09
Module 02	<p>Details and Assembly Drawing: Introduction to unit assembly drawing steps involved in preparing assembly drawing from details and vice versa.</p> <p>Preparation of details & assembly drawings of Clapper block, Single tool post, Lathe & Milling tail stock, Cotter, knuckle joint, Keys and coupling: Keys-sunk, parallel, woodruff, saddle, feather etc.</p> <p>Coupling - simple, muff, Flanged, protected flange coupling, Oldham's coupling, universal Coupling</p>	07
Module 03	<p>Preparation of Details & Assembly Drawings of Bearings- simple, solid, bushes, pedestal, footstep, I.S. conventional representation of ball and bearings</p>	03
Module 04	<p>Preparation of Details & Assembly Drawings of Pulleys- flat belt, V-belt, rope belts fast and loose pulleys, Pipe joints: flanged joints- spigot and gland and stuffing box, expansion joint</p>	06
Module 05	<p>Preparation of details & assembly drawings of Valves- Air cock, Blow off cock, Steam stop valve, gates valve, globe valve, non-return valve, I.C Engine parts: piston, connecting rod, cross head and crankshaft.</p>	08
Module 06	<p>Preparation of details & assembly drawings of Jigs and fixtures.</p> <p>Limits fits and tolerances dimensioning with tolerances indicating various types of fit in details and assembly drawings</p>	06

Theory Examination:

- 1 Question paper will comprise of total seven questions, each of 20 Marks
- 2 Only five question need to be solved.
- 3 Question one will be compulsory and based on maximum part of syllabus.
- 4 Remaining questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
- 5 In question paper weight age of each module will be proportional to number of respective lecture hours as mentioned in the syllabus.

Practical Examination:

Practical examination will be based on part B of the Term work

Term Work:

8

A. Total Marks: 25

(7)

On the date minimum 3 problems

- 1 Sheets on details to assembly of any two topics from Module 2
- 1 Sheets on details to assembly of any two topics from Module 3
- 1 Sheet on assembly to details of any unit topics from Module 4
- 1 Sheets on details to assembly of any two topics from Module 5
- 1 Sheet detail- assembly of Module 6 with fits and tolerances

B. Practicals in AUTOCAD

Computer aided drawing and designing of Assembly, joints, Gears, spring, shaft, pipe fittings, Bearings Jigs and fixtures, I.C. engine parts, pulleys and belts, Limits, fits and tolerances, Rivets, Preparation of 2-D drawings for machine components (bolts, nuts, flange coupling, connecting rod,) - 3-D modeling - solid, surface, wire frame using standard CAD packages, creation of 2-D drawings from 3-D models using CAD packages, different views, sections, isometric view and dimensioning them - Parametric modeling, creating standard machine parts, connecting rod, flange coupling,.

Minimum Four Print out of problems solved in the practical class to be attached in the Term work (module 2 to 6)

The distribution of marks for term work shall be as follows:

- Journal containing of drawing sheets (10) Marks.
- Test (at least one): (10) Marks.
- Attendance (practical & theory): (05) Marks.

TOTAL: (25) Marks.

Reference Books:

- i. Machine Drawing By N. D. Bhatt.
- ii. A text book of Machine Drawing By Lakshminarayan & M. L. Mathur. (Jain brother, Delhi).
- iii. Machine Drawing By Kamat & Rao.
- iv. Machine Drawing By M. B. Shah.
- v. A Text book of Machine drawing By R. B. Gupta (Satya Prakasham Tech publication)
- vi. Machine drawing By K.I.Narayana, P. Kanniah, K. Venkata Reddy.
- vii. Machine drawing with AutoCAD—Gautam Pohit and Gautam Ghosh (Pearson Education)
- viii. Machine drawing By Ajeet Singh (Tata McGraw Hill)

Sr. No.	Details	Hrs.
Module 01	<p>Classification of Manufacturing Process, Ferrous and non-ferrous metals and their alloys used in engineering, their properties and uses.</p> <p>Manufacturing of pig iron, cast iron, wrought iron and steels.</p> <p>Remelting furnaces: such as Cupola, pit-furnace oil fired, gas and electric furnaces, their size, capacity, suitability, construction and working.</p> <p>Pattern making and Foundry: Materials used for pattern making, Types of pattern, Pattern allowances, core box, core prints and cores.</p> <p>Moulding Methods: Hand and Machine moulding techniques</p> <p>Principle of gating, principle of risering, solidification of casting, Defects of casting and inspection of casting.</p>	12
Module 02	<p>Lathes: type of lathes, their construction and working, operation of lathes, screw cutting on C lathe, attachments and accessories used on lathe, type of tools cutting speed, feed, depth of cut and machining time. Capstan and turret lathes, tooling for simple jobs.</p> <p>Elementary treatment of modern lathe such as single spindle and multi-spindle Auto. mats, NC and CNC machines, machining centers.</p>	06
Module 03	<p>Milling Machines: types of machines, horizontal, universal, vertical, Cutters and their applications, Operation on milling machines, Use of driving head and circular table. Direct, simple, compound, differential and angular indexing and helical milling operation. Table feed in milling Work holding devices</p>	05
Module 04	<p>Drilling Machines: Types of machines, Types of drillings, operations such as drilling, boring, reaming, spot facing, counter boring, counter sinking and tapping Drill speeds and feeds.</p> <p>Planing machines, shaping machines and slotting machine: Various types, construction and working, operations and tools, field of application, quick return mechanism and feed mechanisms of these machines.</p> <p>Grinding: Grinding machines such as pedestal, cylindrical surface, centre less and tool and cutter grinder. Operations on the above mentioned machines. Grinding wheel, selection and specifications. Dressing and truing of grinding wheels. Finishing operations such as lapping and honing.</p>	10
Module 05	<p>Welding And Joining Processes: Riveting, soldering and brazing Fusion welding, gas and arc welding, sub merged arc welding – insert gas welding – Electric slag welding – CO₂ welding – thermit welding. Welding Equipments. Pressure welding – solid phase welding – resistance welding, friction welding Process capability and applications. Weld joints- types edge preparations – welding fixtures. Weldability – designs, process and metallurgical considerations – testing and improvement of weldability – microstructure of weld – welding defects.</p>	08
Module 06	<p>Powder Metallurgy</p> <p>Principle, process, applications, advantages and disadvantages of powder metallurgy, Processes of powder making and mechanisms of sintering.</p> <p>Non-Destructive Techniques</p> <p>Dye Penetrant, Magnetic, Electrical, Ultrasonic and Radiographic non-</p>	06

destructive testing methods.

9

(Only basic principles, machines and application), Electrical discharge machining (EDM), Electrochemical machining (ECM), Ultrasonic machining (USM), Laser beam machining (LBM), Electron beam machining (EBM), Plasma arc machining (PAM)

Theory Examination:

1. Question paper will comprise of total seven question, each of 20 Marks
2. Only five question need to be solved.
3. Question one will be compulsory and based on maximum part of syllabus
4. Remaining questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
5. In question paper weightage of each module will be proportional to number of respective lecture hours as mentioned in the syllabus.

Term Work:

Term work shall consist of minimum 06 assignments covering all the topics and a class test. The distribution of marks for term work shall be as follows:

- Assignments: (10) Marks.
- Test (at least one): (10) Marks.
- Attendance (Theory): (05) Marks.

TOTAL: (25) Marks.

Text Books:

Workshop Technology By W. A. J. Chapman part I, II & III

A Textbook of Foundry Technology by M. Lal

Production Technology by R. C. Patel and C. G. Gupta Vol I, II.

Manufacturing Processes & materials for Engineers by Doyle.

Production Technology by HMT

Production Technology by Raghuvanshi

Production technology by Jain & Gupta.

Semester-III

CLASS: SE (Mechanical / Automobile)

SUBJECT: THERMODYNAMICS

Periods per week	1 Period of 60 min.	Lecture	4	Practical	--	Tutorial	1	Hours	Marks
Evaluation System		Theory Examination	3	Practical	--	Oral Examination	--	25	100
		Term Work	--	TOTAL	--		--	25	

Sr. No.	Details	Hrs.
Module 01	Thermodynamic concepts: System, surrounding, state, path, property, Reversible and irreversible process, thermodynamic work, heat, temperature, thermal equilibrium, Zeroth law of thermodynamics. First law of Thermodynamics: Statement, First law applied to non-cyclic process, Internal energy, Application non flow processes viz. Constant volume, constant Pressure, and constant temperature, adiabatic and polytropic processes. Heat and work calculations. Application of First law to open systems, flow work, Steady flow energy equation. Work done in steady flow processes in terms of pressure and volume. Throttling process. Joule's porous plug experiment. Joule-Thompson coefficient, SFEE applied to boiler, nozzle, condenser etc	8
Module 02	Second law of thermodynamics: Limitations of first law of Thermodynamics Heat engine, thermal efficiency, reversed heat engine, coefficient of performance, Kelvin-Planck and Clausius statements and their equivalence, Carnot cycle, Carnot's theorem, Thermodynamic temperature scale.	8
Module 03	Entropy-Clausius inequality, Entropy changes for an ideal gas during reversible process, Entropy of isolated system in real processes. Principle of increase of entropy Introduction to Availability: Available and Unavailable energy, AE when heat is withdrawn from a finite reservoir and when heat is withdrawn from an infinite reservoir. Irreversibility	8
Module 04	Properties of steam: Dryness fraction, enthalpy, internal energy and entropy Steam table and Mollier chart, First law applied to steam processes.	6
Module 05	Power Cycles: Vapour power- Rankine cycle, Modified Rankine cycle for improved performance (Reheat, regenerative) Gas power- Thermodynamics of Otto, Diesel, semi-Diesel and Brayton cycle. Comparison and representation on P-V, T-S diagram.	8
Module 06	Thermodynamics of Fluid flow (One dimensional): Propagation of sound waves through compressible fluids, Sonic velocity and Mach number. Application of continuity, momentum and energy equations for steady state conditions. Steady flow energy equation applied to nozzle. Isentropic flow through ducts of varying cross-sectional area. Effect of varying backpressure on nozzle performance. Area ratio. Critical pressure ratio. Normal shock, basic equations of normal shock, change of properties across normal shocks. Rayleigh and Fanno lines. Adiabatic flow through constant area duct with friction	10

Theory Examination:

1. Question paper will comprise of total seven question, each of 20 Marks
2. Only five question need to be solved.
3. Question one will be compulsory and based on maximum part of syllabus.
4. Remaining questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
5. In question paper weightage of each module will be proportional to number of respective lecture hours as mentioned in the syllabus.

Term Work:

all the topics and a class

- Tutorial work (10) Marks.
- (Practical & Theory): (05) Marks.

TOTAL: (11) (25) Marks.

Oral Examination:

Oral examination will be based on the term work.

Text Books:

1. Engineering Thermodynamics M. A. Saad, Macgraw Hill.
2. Engineering Thermodynamics R. K. Rajput, Lakshmi Publication.
3. Applied Thermodynamics T. D. Eastop and A. McConkey, Addition – Wesley
4. Fundamentals of Compressible fluid flow S. M. Yahya.
5. Thermodynamics J. P. Holman, Macgraw Hill.
6. Engineering Thermodynamics P. K. Nag, Tata Macgraw Hill
7. Fundamentals of Thermodynamics Sonntag, Wiley india

References:

Detailed Syllabus

Lectures/Week

Communication in a business organization:

06

Internal and external communication, Types of meetings, strategies for conducting successful business meetings, documentation (notice, agenda, minutes, resolution) of meetings. Introduction to modern communication techniques.

(e-mail, internet, video-conferencing, etc.) Legal and ethical issues in communication (Intellectual property rights: patents, TRIPS, Geographical indications).

Advanced technical writing:

08

Report writing: Definition and importance of reports, qualities of reports, language and style in reports, types of reports, formats (letter, memo, project-reports) Methods of compiling data for preparing report.

A computer-aided presentation of a technical project report based on survey-based or reference based topic. The topics are to be assigned to a group of 8-10 students. The written report should not exceed 20 printed pages.

Technical paper-writing, Writing business proposals.

Interpersonal skills:

04

Introduction to emotional intelligence, motivation, Negotiation and conflict resolution, Assertiveness, team-building, decision-making, time-management, persuasion

Presentation skills:

04

Elements of an effective presentation, Structure of a presentation, Presentation tools, Audience analysis, Language: Articulation, Good pronunciation, Voice quality, Modulation, Accent and Intonation.

Career skills:

04

Preparing resumes and cover letters. Types of Resumes, Interview techniques: Preparing for job interviews, facing an interview, verbal and non-verbal communication during interviews, observation sessions and role-play techniques to be used to demonstrate interview strategies (mock interviews)

group discussions as part of selection process.
 Structure of a group discussion, Dynamics of group
 behavior, techniques for effective participation, Team
 work and use of body language.

Term work: Part-I (25 Marks): Assignments;

2 assignments on communication topics

3 assignments on report-writing

3 assignments on interpersonal skills

2 assignments on career skills

At least one class test (written)

Distribution of term work marks will be as follows:

Assignments : 10 marks

Written test : 10 marks

Attendance (Theory and Practical) : 05 marks

Term work: Part-II (25 Marks): Presentation;

Distribution of term work marks will be as follows:

Project report presentation : 15 marks

Group discussion : 10 marks

The final certification and acceptance of term-work ensures the satisfactory performance of laboratory work and minimum passing in the term-work.

Books recommended:

1. Fred Luthans: Organizational behavior, McGraw Hill
2. Lesikar and Petit, Report writing for business, Tata McGraw Hill
3. Huckin & Olsen, Technical writing and professional communication, McGraw Hill
4. Wallace & Masters, Personal development for Life & work, Thomson

Lerning.

5. Heta Murphy. Effective Business Communication, McGraw Hill
6. Raman and Sharma, Report writing.

(100)

CLASS: SE (Mechanical / Automobile)

Semester- III

SUBJECT: MACHINE SHOP PRACTICE I

Periods per week	1	Period of 60 min.	Lecture	--	
			Practical	3	
			Tutorial	--	
				Hours	Marks
Evaluation System			Theory Examination	--	--
			Practical	--	--
			Oral Examination	--	--
			Term Work	--	50
			TOTAL		50

Term Work:

1. One job on plain and taper turning.
2. One job on prevision turning, taper turning and screw cutting.
3. One job on shaping machine to make horizontal and inclined surfaces.
4. Two jobs on forging of cutting tools use on lathes.
5. One simple exercise on welding – preparing a component compressive welding joints.

The distribution of marks for term work shall be as follows:

- Laboratory work (experiments): (40) Marks.
- Attendance (practical): (10) Marks.

TOTAL: (50) Marks.

CLASS: SE (Mechanical / Automobile)

Semester- IV

SUBJECT: APPLIED MATHEMATICS - IV

Periods per week	1	Period of 60 min.	Lecture	4	
			Practical	--	
			Tutorial	--	
				Hours	Marks
Evaluation System			Theory Examination	3	100
			Practical	--	--
			Oral Examination	--	--
			Term Work	--	--
			TOTAL	--	100

Sr. No.	Details	Hrs.
Module 01	1. Fourier Series	14
	1.1 Orthogonal and orthonormal functions, Expression for a function in a series of Orthogonal functions	
	1.2 sine and cosine functions and their Orthogonality properties	
	1.3 Fourier Series of periodic functions with period 2π and $2L$, Dirichlets theorem (only statement)	
	1.4 Even and odd functions	
	1.5 Half range sine and cosine series	
	1.6 Parsevalls relations (only statement)	
	1.7 Complex form of Fourier series	
	1.8 Fourier integrals with even and odd functions	
Module 02	2. Partial Differential Equations	12
	Partial differential equation governing transverse vibrations of an elastic string, its formulation and solution using Fourier series	
	Heat equation, steady- state configuration for heat flow	
	Two & Three dimensional Laplace equation.	
Module 03	3. Random Variables:	02
	3.1 Discrete and continuous random variables, probability mass function and density function. Probability distribution for random variables. Expected value, Variance.	
Module 04	4. Probability distributions:	08
	4.1 Binomial, Poisson and Normal Distributions.	
Module 05	5. Sampling theory:	07
	5.1 Sampling distribution. Test of Hypothesis. Level of significance, critical region. One tailed and two tailed tests. Interval Estimation of population parameters. Large and small samples.	
	5.2 Test of significance for Large samples: Test for significance of the difference between sample mean and population means. Test for significance of the difference between the means of two samples.	
	5.3 Student's t-distribution and its properties. Test of significance of small samples: Test for significance of the difference between sample mean and population means, Test for significance of the difference between the means of two Samples, Chi-square distribution and its properties, Test of the Goodness of fit.	
Module 06	6. Fitting of curves:	05
	6.1 Least square method: Fitting the straight line and parabola.	

11

9

Frequency Distributions, Correlation, Co-variance, Karl Pearson Coefficient
&
Spearman's Rank Co-relation Coefficient (non-repeated & repeated ranks,
without proof) Regression Coefficient & lines of regression.

Theory Examination:

1. Question paper will comprise of total seven question, each of 20 Marks
2. Question one will be compulsory and based on maximum part of syllabus.
3. Remaining questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
4. Only five question need to be solved.
5. In question paper weightage of each module will be proportional to number of respective lecture hours as mentioned in the syllabus.

Reference Books:

1. A Text Book of Applied Mathematics : P. N. & J. N. Wartikar
2. Mathematical Statistics : J. N. Kapoor & H. C. Saxena
3. Higher Engineering Mathematics : Dr. B. S. Grewal
4. Probability, Statistics and Random Processes : T. Veerarajan
5. Advance Engineering Mathematics : E. Kreyszig

17

CLASS: SE (Mechanical / Automobile)
 SUBJECT: THEORY OF MACHINES - I

Periods per week	1 Period of 60 min.	Lecture	4	
		Practical	2	
		Tutorial	--	
			Hours	Marks
Evaluation System		Theory Examination	3	100
		Practical	--	--
		Oral Examination	--	--
		Term Work	---	25
		TOTAL		125

Sr. No.	Details	Hrs.
Module 01	<p>1. Basic Kinematics:</p> <p>1.1 Structure, Machine, Link and its types</p> <p>1.2 Kinematics pairs Lower pairs and higher pairs. Form closed pairs and force closed pairs. Based on relative motion permitted such as revolute, prismatic, cam, helical, Globular.</p> <p>1.3 Kinematics chain and Mechanisms: Grubler's criterion for movability of chains and mechanisms has locked, constraint, Unconstrained based on Grubler's criteria. Limitations of Grubler's Criteria</p> <p>1.4 Inversion of chain: Study of various mechanisms derived from inversions of following chains with regard to motion of links of mechanisms motion modification, quality of motion transmission (uniform, non-uniform SHM, Non-SHM), limiting positions, dead positions, quick return property, applications. Four bar chain (Grashoffian, non-Grashoffian), Single slider crank chain, Double slider crank chain.</p> <p>1.5 Special Mechanisms:</p> <p>Straight line generating Mechanisms: Exact Straight Line Generating Mechanisms – Peaucellier's, Hart's. Approximate Straight Line Generating Mechanisms – Watt's, Robert's, Evan's and tchebicheff's.</p> <p>Offset slider crank mechanisms, Pantograph, Hook joint- single and double, Steering gear mechanisms – Ackerman, Davis</p>	10
Module 02	<p>Velocity and Acceleration analysis of mechanism (mechanisms up to 6 links).</p> <p>2.1 Velocity analysis by instantaneous centre of rotation method (Graphical approach)</p> <p>2.2 Velocity analysis by relative velocity method (Graphical approach)</p> <p>Analysis is extended to find rubbing velocities at joints, mechanical advantage (Graphical approach)</p> <p>2.3 Velocity and Acceleration – analysis by relative method (mechanisms upto 6 link) including pairs involving Coriolis acceleration (Graphical Approach).</p>	10
Module 03	<p>Kinetics of Rigid Bodies:</p> <p>3.1 Mass M. I. about centroidal axis and about any other axis. Radius of Gyration, D'Alemberts Principle of bodies under rotational motion about a fixed axis and plane motion. Applications of motion of bars, cylinders and spheres only.</p> <p>3.2 Kinetics of Rigid Bodies : Work and Energy</p> <p>Kinetic energy in translating motion; Rotation about fixed axis and in general plane motion. Work energy principle and conservation of energy.</p>	7

Module 04 Static & Dynamic force analysis of plane mechanisms.

7

10

4.1 Static and dynamic force analysis in slider crank mechanisms (neglecting mass of connecting rod and crank), Engine force analysis, Turning moment on crank shaft

4.2 Dynamically equivalent systems to convert rigid body to two mass systems with and without correction couple.

4.3 Flywheel and its applications, Fluctuation in energy, function of flywheel, estimating inertia of flywheel for reciprocating prime movers and machines.

Module 05 Flexible Connectors:

6

5.1 Belt & Rope Drives – Types of belts, velocity ratio, slip & creep of belt, length of belt for open & cross systems, law of belting, dynamic analysis-driving tensions, centrifugal tension, initial tension, condition of maximum power transmission.

5.2 Chains – types of chains, chordal action, variation in velocity ratio, chain length

Module 06 Gears

8

6.1 Law of gearing, Conjugate profile and its graphic construction, Involute and Cycloid gear tooth profile, Construction of involute profile.

6.2 Path of contact, arc of contact, contact ratio for involutes and cycloid tooth profile, Interference in involutes gears, Critical Numbers of teeth for interference free motion, Methods to control interference in involutes gears

6.3 Static force analysis in gears- spur, bevel, helical, worm & worm gears

Theory Examination:

1. Question paper will comprise of total seven questions, each of 20 Marks
2. Only five question need to be solved
3. Question one will be compulsory and based on maximum part of syllabus.
4. Remaining questions will be mixed in nature (for example supposed Q 2 has part (a) from module 3 then part (b) will be from any module other than module 3)
5. In question paper weight age of each module will be proportional to number of respective lecture hours as mentioned in the syllabus.

Term Work:

Assignment based on topics covered under all modules 1 to 6. (To be covered in practical Hrs.) Minimum 4 problems on each module.

Graphic work (on half imperial drawing sheets)

Text Books:

1. Theory of Mechanisms and Machines by Amitabha Ghosh and A. Kumar Malik.
2. Theory of Mechanisms and Machines by Shigley
3. Theory of Machines by Ballaney
4. Theory of Machines by Rattan

References:

1. Kinematics of Machines by R. T. Hinchkle (Prentice Hall Inc.)
2. Kinematics by V. M. Fairs (Mcgraw Hill)
3. Mechanism Design: Analysis and Synthesis Vol. I by A. Erdman and G. N. Sander (Prentice Hall Inc.)
4. Kinematics and dynamics of Planer Mechanisms by Jeremy Hirsishai (Mcgraw Hill).

19

- Laboratory work (experiments/assignments): 10 Marks.
 - Test (at least one): 10 Marks.
 - Attendance (practical & theory): 05 Marks.
- Total: 25 Marks.

CLASS: SE (Mechanical / Automobile)

Semester-IV

SUBJECT: THERMAL ENGINEERING

Periods per week	1	Period of 60 min.	Lecture	4	Practical	2	Tutorial	--	Hours	Marks
Evaluation System			Theory Examination	3					3	100
			Practical	--				--	--	--
			Oral Examination	--				--	25	25
			Term Work	--				--	25	25
TOTAL										150

Sr. No.	Details	Hrs.
Module 01	Combustion of refractive mixtures: Combustion reactions, stoichiometric air A/F, actual A/F ratio, Heat of combustion-open and closed system, Enthalpy and internal energy of reaction, Enthalpy of formation, Calorific value at constant pressure and constant volume. First law for reactive system, Adiabatic combustion temperature. Entropy changes for reacting mixtures.	8
Module 02	Compressors - Reciprocating: Single stage reciprocating compressor-neglecting clearance. Multistaging of compressors. Two stage air compressors, Perfect inter-cooling. Ideal inter cooler pressure. Minimum work. Free air-delivered, volumetric efficiency, isothermal and adiabatic efficiency. Effect of clearance volume on F.A.D and volumetric efficiency, Work, power and efficiency calculations.	8
Module 03	Steam Generator: Fire tube and water tube boiler, Low pressure and High-pressure boilers, once through boiler, examples, Important features of HP boilers, Mountings and accessories. Layout of a modern HP boiler. Equivalent evaporation of boilers. Boiler performance. Boiler efficiency.	8
Module 04	Steam Condensers: Elements of condensing plant, Types of condensers, surface and evaporative condenser. Partial pressure, effect of air leakage, vacuum efficiency. Air pump capacity. Mass of cooling water.	6
Module 05	Steam Nozzles: Flow through steam nozzle- velocity at exit and condition for maximum discharge, nozzle efficiency. Steam Turbines: Basic of steam turbine, Classification, compounding of turbine, Impulse turbine-velocity diagram, condition for maximum efficiency. Reaction turbine- velocity diagram, degree of reaction, Parson's turbine. Condition for maximum efficiency.	10
Module 06	Gas Turbine: Application of gas turbine, Actual Brayton cycle, open and closed cycle gas turbine, methods to improve efficiency and specific output, open cycle with intercooling, reheat, and regeneration. Effect of operating variable on thermal efficiency and work ratio.	8

List of Experiments:

1. Study of boilers mountings and accessories
2. Study of experiments on heat balance sheet of boiler.
3. Study of experiments on gas turbine
4. Study of experiments on mass flow rate of air through orifice plate or nozzle.
5. Study of steam turbines.
6. Trial on air compressors.
7. Study of experiments on calorific value at constant pressure and constant volume.
8. Determination of dryness fraction

Theory Examination:

1. Question paper will comprise of total seven question each of 20 Marks
2. Only five question need to be solved.
3. Question one will be compulsory and based on maximum part of syllabus.

- (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
5. In question paper weightage of each module will be proportional to number of respective lecture hours as mentioned in the syllabus.

Term Work:

Term work shall consist of minimum 07 experiments, assignments, written test and a Report on visit of Thermal Power Plant. The distribution of marks for term work shall be as follows.

- Laboratory work (experiments/assignments/ Visit Report): 10Marks.
- Test (at least one): 10Marks.
- Attendance (practical & theory): 05Marks.

TOTAL: 25Marks.

Oral Examination:

Oral examination will be based on the list of experiments given in the syllabus and the term work.

Text Books:

1. Thermal Engineering by Ballaney, Khanna Publishers, Reprint 1994.
2. Thermal Engineering by Kothandraman, Domkundwar, Khajuria, Arora Dhanpatrai & sons.
3. Thermal Engineering by R. K. Rajput.
4. Steam and gas Turbine by R. K. Yadav.
5. Thermodynamics by P. K. Nag – Tata Mcgraw Hill co. Reprint 1992.
6. Thermodynamics and Heat Engines Vol II by R. Yadav, Central Publishing house, Reprint 1994.
7. Turbines, Compressors and Fans by S. M. Yahya, Tata Mcgraw Hill.

References:

1. Principle of Thermodynamics by H. A. Sorensen, A. Merimal Publications, 1972
2. Applied Thermodynamics for Engineers and Technologists By Eastop and Mcconky Longman 1978.

CLASS: SE (Mechanical / Automobile)
SUBJECT: PRODUCTION PROCESS -II

Semester-IV

Periods per week	1	Period of 60 min.	Lecture	4	
			Practical	2	
			Tutorial	--	
				Hours	Marks
Evaluation System			Theory Examination	3	100
			Practical	--	--
			Oral Examination	--	25
			Term Work	--	25
			TOTAL		150

Sr. No.	Details	Hrs.
Module 01	Design of Jigs and Fixtures:- Need for jigs fixtures, elements of Jigs and fixtures, principles of location, design of locating elements, locating pins support pins spring back, vee blocks, etc. principles of clamping simple hand operated clamps, like screw clamp, lever clamps and other types, of clamps. Drill bushes- their types and applications indexing devices, auxiliary elements. Design of drill jigs like plate leaf solid and box types for drilling combined with reaming, spot facing etc. Design of milling fixtures such as plain, string, gang and indexing types. Design of turning fixtures	09
Module 02	Metals Cutting & Tool Engineering:- features of machining processes, concept of speed and cutting, mechanism of chip formation, concept of shear plane, chip reduction coefficient force analysis Merchant's circle of cutting forces, expression for shear plane angle and coefficient of friction in term of cutting forces and tool angles. Merchant's theory- original and modified cutting force and power calculation in machining processes, gross power, efficiency of machine tools, effect of various parameters on cutting forces, methods of estimating of cutting forces. Economics of metal cutting:- parameters affecting machining cost. Tool life for minimum cost and for max. Productivity.	8
Module 03	Measurement of cutting forces:- different types of dynamometers and their operations. Tool life definition, mechanism of tool wear and measurement preliminary and ultimate feature, factors influencing tool life such as speed, feed, depth of cut, tool material, cutting fluids etc. Surface finish-influence of various parameters cutting tool materials-composition, field of application and manufacture. (carbon tool steel, high speed steel, non-ferrous alloys, carbides and ceramics) coolants -function of coolants, effects on cutting force, tool life and surface finish, Types of coolants, Choice of coolants.	8
Module 04	Design of cutting Tools:- Tool geometry and definition of principles tool angles of single point cutting tools, Design of single point cutting tools, Form tools, Boring tools, Drills, Reamers Milling cutters, Inserted type cutters, Broach tools, Milling:-mechanism of process, mean chip thickness, power calculation in milling, gear milling, standard cutters and limitations, gear hobbing, gear shaping, gear shaving and gear grinding processes.	07
Module 05	Sheet-metal Working:- Elementary treatment of press working, operation on presses, press devices and classification of presses, design of blanking, piercing, compound, progressive, bending, forming, and drawing dies, load calculations, development of blanks, scrap strip layout, design of punches, selection of die-sets, stock guides, strippers, pilots, stop, etc. selection of presses, capacities and other details.	10
Module 06	Rolling and Forming of metal: Principles and process characteristics, Rolling mill-types and capacities, Rolling parameters: Draught, spread, elongation, roll pressure, torque, work and power in rolling, Effect of front and back tension on rolling load, Principles of roll pass design, Miscellaneous processes like thread rolling, Rolling defects. Forging, extrusion, rotary swaging (process, types, advantages, limitations and applications only)	06

Theory Examination:

1. Question paper

23

question need to be solved.

3. Question one will be compulsory and based on maximum part of syllabus.

4. Remaining questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then

part (b) will be from any module other than module 3)

5. In question paper weightage of each module will be proportional to number of respective lecture hours as

mentioned in the syllabus.

Oral Examination :

Oral examination will be on maximum portion of syllabus.

Term Work:

At least one assignment on each module of the Syllabus shown above, including at least two A-3 Sheets on press tools and Jigs and fixtures.

The distribution of marks for term work shall be as follows:

- Assignments (10) Marks
- Test (at least one): (10) Marks.
- Attendance (practical & theory): (05) Marks.

TOTAL: (25) Marks.

Text Books:

1. Tool Design By Donaldson.
2. Jigs & Fixtures By P H Joshi.
3. Prod. Tech. By R.C.Patel & C.G. Gupte.
4. Workshop Tech. By W.Aj. Chapman
5. Machining Process By H.L. Juneja

References:

1. Fundamentals of Tool Design By ASTME
2. Metal cutting Theory & Cutting Tool Designing By V. Arshinov, G Alekseev
3. Fundamentals of By Donaldson
4. principle of Metal cutting By Sen & Bhattacharya
5. Fundamentals of Metal MACHINING By Geoffery Boothroyd
6. Fundamentals of Tool Design By ASTME
7. Introduction to Jigs & Tool Design By MHA Kempster.
8. Production Tooling & Equipment By WA J Parsons
9. Die Design Fundamentals By J.R. Paquin.
10. Rolling of Strip, Sheet & Plate By E C Larke & M.Cook.
11. RollPass Design By British Steel Corporation
12. Techniques of Press Working Sheet Metal By Emory Reed
13. Production Technology - HMT..

Recrystallization Annealing. Theory and stages of recovery. Recrystallization and grain growth. Factors affecting recrystallation Recrystallation temperature. Hot and cold working theory. Their advantages, limitations and applications.</p>	8
Module 02	<p><u>Fracture</u></p> <p>Definition and types of fracture.</p> <p>Brittle fracture. Griffith's theory of fracture. Orowan's modification. Dislocation theory of fracture. Critical stress and crack propagation velocity for brittle fracture.</p> <p>Ductile fracture.</p> <p>Notch effect on fracture.</p>	8

Definition of fatigue and significance of cyclic stress.

Mechanism of fatigue and theories of fatigue failure

Fatigue testing. Test data presentation and statistical evolution S.N. Curve and its interpretation Influence of important factors on fatigue. Notch effect surface effect. Effect of pre-stressing, corrosion fatigue Thermal fatigue

Creep

Effect of temperature on mechanical behaviors of materials

Definition and signification of creep

Creep testing and data presentation.

Mechanism and types of creep.

Creep Resistant materials.

Module
03

Theory of Alloys & Alloys Diagrams

Significance of alloying. Definition. Classification and properties of different types of alloys.

Different types of alloy diagrams and their analysis

Importance of Iron as engineering material, Allotropic forms of Iron, Influence of carbon in Iron-Carbon alloying.

Iron- Iron carbide diagram and its analysis.

Module
04

Heat treatment Process:

Technology of heat treatment

Classification heat treatment process

Annealing- Principle process, properties and applications of full annealing, Diffusion annealing, process annealing and Cyclic annealing, Annealing defects and their remedies.

Normalizing. Hardening heat treatment, Hardening baths, Hardening media, Salt baths, Hardenability, Tempering, Subzero treatment, Austempering, Martempering, Maraging and Ausforming process.

Module
05

Surface Hardening & Diffusion Coating Processes

Hardening and surface Hardening methods. Their significance and applications. Carburizing, Nitriding, Cyaniding, Carbonitriding, induction hardening and flame hardening processes. Diffusion coating processes of Colorizing, Chromising, Siliconizing and Boron diffusion.

Module
06

Effect of Alloying Elements in Steels:

Limitation of plain carbon steels. Significance of alloying elements

Effects of major and minor constituents, Effect of alloying elements on ferrite, carbide, austenite, Effect of alloying elements on phase transformation, decomposition, hardening and tempering.

Classification of tool steels and metallurgy of tool steels and special steels.

Strengthening Mechanism:

Theory and applications of strain hardening, Age hardening, Precipitation hardening and Dispersion hardening.

Theory Examination:

1. Question paper will comprise of total seven question, each of 20 Marks out of 26 Marks

2. Only five question need to be solved.
3. Question one will be compulsory and based on maximum part of syllabus.
4. Remaining questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
5. In question paper weightage of each module will be proportional to number of respective lecture hours as mentioned in the syllabus.

Term Work:

Term work shall consist of

1. Assignments On topics drawn from syllabus.
2. Practicals. Base on topics from syllabus experiments can be conducted and presented with inferences
3. Factory report. Preparation of equipment, process, quality control and failure analysis of engineering components reports after visit to important industrial plants.
4. At least one class test.

The distribution of marks for term work shall be as follows

- Laboratory work (assignments, Practicals, Factory report) 10 Marks.
- Test (at least one): 10 Marks.
- Attendance (practical & theory) 05 Marks.

TOTAL: 25 Marks.

Text Books:

1. Mechanical Metallurgy: G E Dieter, McGraw hill International New Delhi
2. The Structure and Properties of Materials Vol I: M G Moffet, G T W Pearsall & J Wulff
3. Materials Science and Engineering by William D. Callister, Jr. – Adapted by R Balasubramaniam, Wiley India (P) Ltd
4. Metallurgy for Engineer- E C Rollason - ELBS SOC And Edward Arnold, London.
5. Mechanical Behaviour of Materials- Courtney- McGraw hill International New Delhi

References:

1. Metallurgy Engineering Part I&II-R A. Higgins & Hodder Stoughton, London.
2. A text book of Metallurgy- A R Bailey – Macmillan & Co Ltd, London.
3. Introduction to solids- L.V Azaroff- McGraw hill International New Delhi.
4. The Structure and Properties of Engineering Alloys- W.F. Smith- McGraw hill International, New Delhi.
5. Strengthening of Metals Packner - Reinhold PUBLISHING Corporation, New Delhi.
6. Engineering Physical Metallurgy, By Y. Lakhtin, Mir Publishers, Moscow.
7. Physical Metallurgy for Engineers, By Donald S. Clarke and Wibur R. Varney, D. Van Nostrand Co INC.
8. Engineering Metallurgy Part I & II, By Raymond A. Higgins, English Language Book Society & Hodder & Stragton.
9. A text book of Metallurgy, By A.R. Bailey Mc Millan & Iti, London.
10. Structure and Properties of Alloys, By Robert M, Brick, Robert B, Gordon, McGraw hill International Book Co.
11. Metallurgy for Engineers, By E.C. Rollason, English Language Book Society & Edward Arnold Publisher Ltd.
12. Introduction of Engineering Materials, By B.K. Agrawal, McGraw Hill Publishing Co. Ltd
13. A text book of Egg., Metallurgy and material technology, by N V Fursula satya pub, New Delhi.
14. The Science and Engineering of Materials, By Donald R. Askeland- PWS Publishing Co.
15. Physical Metallurgy by Avener

Sr. No.	Details	Hrs.
Module 01	Thyristors and their Applications	08
	1.1 Introduction	
	1.2 Applications	
	1.3 Symbolic Representations	
	1.4 Specification	
	1.5 Principal of Operation of SCR	
	1.6 Two-Transistor Analogy of SCR	
	1.7 DIAC	
	1.8 TRIAC	
	1.9 Basic Triggering circuits for Thyristers	
	1.9 Rectifier Circuits using SCR	
Module 02	Invertors, Choppers, Converters	08
	2.1 Commutation circuits	
	2.2 Invertors: series and parallel	
	2.3 Choppers: Step-up, Morgan's, Jones's	
	2.4 Single phase and three phase Converters	
Module 03	3.1 Solid State Control of D.C. Motors	10
	Introduction	
	Advantage of Electronic Control	
	D.C. Motor Speed Control	
	Speed Control of D.C Shunt Motors using Thyristors	
	Over-voltage Protection of D.C. Motors	
	Overload Protection of D.C. motors	
	Closed loop control	
	3.2 Solid State Control of A.C. Motors	
	Introduction	
	A.C. Motor Control	

Module Operational Amplifier 741 & ICNE 555
04

08

5.1 Introduction, pin diagram, characteristics, specifications

5.2 Applications of IC 741 - Integrator, differentiator, adder, comparator, instrumentation amplifier

5.3 Application of IC555- Astable, Monostable, Bistable Multivibrators, Timing circuits

Module Digital Electronics
05

08

Binary logic, positive, negative, logic Boolean algebra basic theorem, DeMorgan's theorem, logic circuits, standard logic gates, universal logic gates, Ex-OR and Ex-NOR (Symbol, equation and truth table), implementation of Boolean equation using basic gate and universal gate, reduction of Boolean equation using two variable K-Map

Module Introduction to 8085 Microprocessor
06

06

Architecture, Instruction sets, simple program writing, interfacing with memory and Input/Output devices, Applications

List of Experiments:

1. Firing Characteristic of An SCR
2. Half-wave Gate-controlled Rectifier Using One SCR
3. Single Phase Half-controlled Full-wave Rectifier using Two SCRs and Two Diodes
4. Illumination / Fan Control using SCR
5. Characteristic of a Triac
6. Application of a Triac for Illumination Control
7. Firing circuit using Unijunction Transistor
8. SCR Controlled Emergency Light
9. Speed Control of D.C. Shunt Motor using SCR
10. Study of Integrator using OPAM 741
11. Study of Differentiator using OPAM 741
12. Study of Adder using OPAM 741
13. To Run a simple program on Microprocessor 8085 such as addition etc
14. Study of a Three phase rectifier using Power diodes.
15. Study of an Electronic timer using IC NE- 555

Theory Examination:

1. Question paper will comprise of total seven question, each of 20 Marks
2. Only five question need to be solved.
3. Question one will be compulsory and based on entire part of syllabus.
4. Remaining questions will be mixed in nature (for example supposed Q 2 has part (a) from module 3 then part (b) will be from any module other than module 3)
5. In question paper weight age of each module will be proportional to number of respective lecture hours as mentioned in the syllabus.

Term Work:

Term work shall consist of minimum 08 experiments performance & writing, assignments and written test in the form of journal. The distribution of marks for term work shall be as follows:

- Laboratory work (experiments performance & writing assignments): 10 Marks
- Test (at least one): 10 Marks.
- Attendance (practical & theory): 05 Marks.

TOTAL: 25 Marks.

Text Books:

29

1. Thyristors and its applications by Ramamurthy, East-West New Delhi.
2. S.K Bhattacharya/S Chatterjee, Tata McGraw Hill Publishing Company Limited
3. Industrial Electronics, by James Humphries, Leslie Sheets, 4e-Delmar Publication
4. Industrial Electronics by Biswanth Paul PHI
5. Industrial Electronics for Technicians – by J.A. Sam Wilson Joseph Rissi, Prompt Publication

CLASS: SE (Mechanical / Automobile)

Semester- IV

SUBJECT: MACHINE SHOP PRACTICE - II

		Hours	Marks
Periods per week	1		
Period of Lecture	60 min.	--	
	Practical	2	
	Tutorial	--	
Evaluation System	Theory Examination	--	--
	Practical	6(PE)	50
	Oral Examination	--	--
	Term Work	--	25
	TOTAL		75

Practical Examination:

Practical examination will be held for one day (6 hours) only and shall consist of preparation jobs in precision turning, boring, screw cutting, Drilling, shaping, grinding etc.

Term Work:

One composite job consisting minimum four parts employing operations on lathe, precision turning, screw cutting, boring etc. and involving the use of shaping, milling and grinding operations

The distribution of marks for term work shall be as follows:

- Laboratory work (experiments) (20) Marks.
- Attendance (practical): (05) Marks.

TOTAL: (25) Marks.
